SESSION (2024-2025)

INDEPENDENCE DAY CELEBRATION

JANMASHTAMI CELEBRATION

ENGLISH LETTER WRITING THROUGH SAND

OBJECTIVES

It enhances fine motor skills, as children use their fingers or tools to form letters, improving hand-eye coordination. This tactile experience also aids in letter recognition, reinforcing their understanding of the alphabet in a playful way. Writing in sand introduces the concept of communication through writing in an engaging and enjoyable manner, making it a valuable educational tool for early childhood development.

EVS ACTIVITY

It promotes nutrition awareness by helping children distinguish between healthy and unhealthy foods, emphasizing the importance of nutrition for their growth. Through activities that involve categorizing or tasting different foods, students practice decision-making skills and learn to make informed choices about their diets.

EVS ACTIVITY (TRANSPORT)

OBJECTIVE

The objectives of studying modes of transport encompass several key areas. First, it aims to analyze the functionality of different transport types—road, rail, air, and water—and their specific roles in moving people and goods

MATHS ACTIVITY

OBJECTIVE

The objective of a counting activity for pre-primary students is to build foundational math skills in a fun and engaging way. Through hands-on activities, children learn to recognize numbers and understand the concept of quantity by counting objects, such as toys or pins. This experiential learning approach enhances their number recognition, promotes one-to-one correspondence, and helps develop their ability to compare and group items. Additionally, counting activities foster fine motor skills as children manipulate objects, and they encourage language development through the use of counting vocabulary.
