Report on Number Counting Activity (1–4) Using Ice Cream Sticks

DATE:15/10/2025

Today, the students participated in a number counting activity from 1 to 4 using ice cream sticks. The children were given sets of sticks and were asked to count and place the correct number of sticks for each numeral. This hands-on activity helped them understand the concept of number quantity and counting sequence in a fun and interactive way.

The students enjoyed the activity and participated enthusiastically. It helped them improve their fine motor skills, number recognition, and one-to-one correspondence. Overall, the activity was engaging and effective in reinforcing the concept of counting numbers from 1 to 4.
