## Report on Educational Visit to Raman Science Centre

Date: 11-04-2026

An educational visit to the Raman Science Centre was organized on 11th April 2026 for the students. The purpose of the visit was to enhance students' knowledge and provide them with practical exposure to scientific concepts.

The students explored various galleries that displayed interactive exhibits related to science, technology, and the environment. They showed great enthusiasm while observing models, experiments, and engaging activities that made learning fun and interesting. The visit also included a session in the science park, where students learned through hands-on experiences.

The trip was well-organized, and all safety measures were followed. Teachers guided the students throughout the visit and explained important concepts in a simple and engaging manner.

### Conclusion:

The visit to the Raman Science Centre was informative and enjoyable. It helped students develop curiosity, improve their understanding of science, and encouraged them to learn beyond the classroom.
